Timok Vetch

*Vicia sativa*

- New release form SARDI Vetch Breeding program
- Matures between Rasina and Morava (from seeding to full flowering 100 – 110 days)
- High yielding and rust resistant but is only moderately resistant to ascochyta blight
- Very good vigour at flowering
- Timok is ideally suited to grain production in areas with > 380mm rainfall/yr.
- Timok’s DM is similar to Morava in high rainfall (> 400mm), but 19% higher than Morava in low to medium rainfall regions (330 – 380mm)
- Multipurpose variety–can be used for grain, hay/silage, grazing or green/brown manure.
