

Parabinga has an increased pod size and better persistence in drier, marginal rainfall areas than all other medic varieties. Parabinga shows improved pest resistance with moderate resistance to Blue Green Aphid and Spotted Alfalfa Aphid. Ideal for hay or grazing in low rainfall areas Parabinga is well adapted to a wide range of Neutral to Alkaline soil types.

- Good dry matter production in low rainfall environments
- Excellent persistence and high seed production
- Suited to a wide range of neutral to alkaline soils
