

Paraggio Barrel Medic is a larger seeded Barrel Medic type which provides good seedling establishment and a semi erect growth habit. This makes Paraggio a good forage producer in areas receiving more than 375mm per annum. Paraggio has lower levels of hard seed than other barrel medics which assists in regeneration in following years.

- Ph 7.0 - 8.5
- Very high leaf to stem ratio means Paraggio is a high herbage producer
- Prostrate in early growth, with prolific branching
- Resistant to blue green aphid
- Very leafy cultivar with excellent herbage and feed / hay quality characteristics
