

- New leaf holding gene to allow for longer levels of forage holding ability
- Leafy, vigorous and competitive, high quality and high yielding medic for medium rainfall, neutral to alkaline heavier soils
- Extremely high leaf to stem ratio, ideal for hay making enterprises
- Resistant to major aphid pests (spotted alfalfa and blue-green aphids)
- Improved seedling tolerance to red legged earthmite and lucerne flea
- Excellent addition to long term pastures where winter production is paramount
- Better option than Paraggio, Mogul
