

ESTABLISHMENT GUARANTEE®

Thankyou for buying the quality Pasture Genetics product. Pasture Genetics wish you the very best for a successful season. Farming can be a hazardous business and on occasions it may be necessary to replant a crop when the initial establishment is unsatisfactory. Pasture Genetics are pleased to announce an "Establishment Guarantee®" on all seed carrying this tag. **The "Establishment Guarantee®" program provides replacement seed at half the original purchase price should the original crop establishment be deemed to be unsatisfactory.** All you need to do is complete the attached form within 30 days of planting to be eligible for this program. Note: Full terms and conditions or seperate registration option available at pasturegenetics.com

ESTABLISHMENT GUARANTEE[®]

Thankyou for buying the quality Pasture Genetics product. Pasture Genetics wish you the very best for a successful season. Farming can be a hazardous business and on occasions it may be necessary to replant a crop when the initial establishment is unsatisfactory. Pasture Genetics are pleased to announce an “Establishment Guarantee[®]” on all seed carrying this tag. **The “Establishment Guarantee[®]” program provides replacement seed at half the original purchase price should the original crop establishment be deemed to be unsatisfactory.** All you need to do is complete the attached form within 30 days of planting to be eligible for this program. Note: Full terms and conditions or separate registration option available at pasturegenetics.com

ESTABLISHMENT GUARANTEE[®] TERMS AND CONDITIONS

1. The Establishment Guarantee[®] program applies to the establishment of Pasture Genetics products within the first 30 days after planting, in cases where best management practices have been used. The program does not cover crop failure after this time.
2. Growers must register to be eligible for the Establishment Guarantee[®] program. Registration can be obtained by filling out the bag tag and sending it to Pasture Genetics or by registering on-line at pasturegenetics.com. Pasture Genetics reserve the right not to provide replant seed in cases where registration has not occurred.
3. Claims for Establishment Guarantee[®] can be submitted to Pasture Genetics through the outlet from which the seed was purchased.
A Pasture Genetics representative or an agent appointed by Pasture Genetics must verify the claim before approval is provided. A proof of purchase must also be provided.
4. Claims must be submitted to Pasture Genetics before the paddock is sprayed, grazed or ploughed for replant.
5. In the event of a claim being approved, Pasture Genetics shall provide replant product to the dealer the product was purchased from. Growers can then purchase the product at 50% off the original purchase price.
6. Replant seed will be provided for the same crop year that the original seed is purchased and planted.
7. The replant credit will apply to the retail price of the replant product, but does not apply to the cost of any additional (nonstandard) seed treatments in the original purchase product or on the replant product.
8. In the event the product has been used as part of a seed mix, the Establishment Guarantee[®] will apply only to the portion of the mix made up of Pasture Genetics products.
9. In the case of a successful claim Pasture Genetics will endeavour to provide seed of the same or similar variety (subject to availability). If there is a ‘sold-out’ situation seed will be provided the following season.
10. If the purchaser decides not to replant, or after the replant product is provided to the purchaser, all obligations under the Establishment Guarantee[®] have been met.
11. The decision of Pasture Genetics, or any of their representatives or agents, shall be final and no correspondence shall be entered into.

Please fill in the attached form, put it in a stamped envelope then send it to:
